These bushings are made from phenolic tubing, where the XXX designates the length in millimeters. We also sell lengths of phenolic tubing.

DSC and NAAMS STANDARD COMPONENTS

Douglas Stamping Company supplies top quality shims, spacers, washers and the full range of NAAMS assembly components for Factory Automation. DSC quality components are recognized worldwide.

LASER CUTTING AND ETCHING

Douglas Stamping Company can laser cut and mark to your specifications. Whether you require a standard shim or spacer in a non-standard thickness or need a component cut to your drawing or print, we are equipped to meet your requirements.

STAMPING

Douglas Stamping Company began as a stamping business in 1947. While our capabilities and product lines have grown and changed over the decades, we maintain our expertise in traditional stamping processes for customer production runs and our product lines.

BENDING

Douglas Stamping Company can bend and hem to your specifications using the latest in bending brake technology
